Title: Enhancing Cary's Emergency Response

The Town of Cary Police Department is requesting \$13,483 in JAG funding to improve our response during critical events, including severe weather. The funding will provide portable power stations and rapid-deploy technology kits, featuring cables, power supplies, and MiFi devices, for our Technology Resource and Support Vehicle, ensuring officers have reliable power and connectivity when it is needed most. We welcome feedback from community members to help strengthen Cary's emergency response.
